Dear Hiring Manager,

I'm keen to apply for the **Frontend/Full-stack Software Engineer** position. With over 12 years of experience in web and mobile development, I've had the chance to work on a wide range of projects—from building new apps from scratch to improving existing systems. I enjoy solving problems through code and creating user-friendly applications that really make a difference.

In my current and past roles, I've worked closely with design, backend, and product teams to bring ideas to life. I take part in planning, daily stand-ups, and help mentor junior developers. I'm comfortable working in fast-moving environments and always aim to build things that are clean, reliable, and aligned with what the business needs. I'm a quick learner and easily adapt to new technologies.

After reading the job description, I felt this role really aligns with my skills and the kind of work I enjoy doing. I'm excited about the opportunity to bring my experience to your team.

In addition to my professional work, I regularly invest time in learning and building personal projects. Below are a few examples I've worked on,

- Developed a complete Spring Boot application, containerized it using Docker (including image creation and container orchestration with Docker Compose), and deployed it on Kubernetes.
- Authored and published a reusable utility package to the npm registry (<https://www.npmjs.com/package/@satheeshpolu/utls-package>) to streamline common frontend tasks.
- Developed and maintained REST API and GraphQL endpoints, enhancing data flow between the frontend and backend services. Created and managed Docker images for backend services, facilitating smoother deployments and local development environments.
- Created end-to-end CI/CD pipelines by using Jenkins and GitLab for my projects.
- Developed several hobby projects from scratch by using Angular, VueJS and React Native, deployed them to the free hosting servers like Heroku and firebase.

Thank you and I'm looking forward to speaking with you.

Best regards,
Satheesh Polu
